

The 164th International Training Course
“Effective Measures for Treatment, Rehabilitation and Social Reintegration
of Juvenile Offenders”

1. Duration and Participants

- From 17 August to 23 September 2016
- 24 overseas participants from 19 countries
- 7 domestic participants

2. Programme Overview

Many countries have established specified juvenile justice systems and laws with a view to promoting welfare, personal development and education. This is because juveniles are socially and psychologically immature, and they are susceptible to stress and trauma. On the other hand, it can be said that juveniles are often more responsive to efforts at rehabilitation and reintegration with appropriate intervention and support. Since juveniles in conflict with the law face a critical stage of their lives for rehabilitation and reintegration, it is important to promote well-being and personal development of juveniles by providing appropriate measures and treatment, making use of this formative period. This training course will focus on the rehabilitation and social reintegration of juveniles who are subject to institutional treatment and community-based treatment.

3. Lectures
